Bamazon (An Amazon-type online store application)

Displays 10 items / products for sale: Item ID / Number, Product Name, Store Department, Price and Quantity in Stock.

Asks the customer,   Which product would you like to purchase? [Type Product Name or Quit with Q]"

The entire list then refreshes showing the Amazon Tap product s stock quantity (subtracted 5 from 48) in inventoritis now 43.

And the application also displays a new prompt for the customer
